**SUPPLEMENTARY INFORMATION:** This Final Environmental Impact Statement for the Comprehensive Management and Use Plan presents a proposal and an alternative for guiding the future management of the four national historic trails. The plan serves as a coordinating document that provides broad-based policies, guidelines, and standards for administering the four trails in such a manner, as to ensure the protection of trail resources, their interpretation and continued use. Both alternatives aim to balance resource preservation and use. Alternative 1 (current conditions) reflects the wide variability in the administration and management, resource protection strategies, and interpretation, visitor experience and visitor use that exists today. Alternative 2 (the proposal) focuses on enhancing resource protection and visitor use. It calls for an improved visitor experience through integrated development and programming and a comprehensive strategy for resource protection, including an ambitious program to inventory and monitor resources that would bring together, in one location, information currently dispersed.
